

HEALTH, SAFETY AND ENVIRONMENT

Wah Seong Corporation Berhad is fully committed to ensure no harm to people and no damage to the environment. To this end, we have a zero tolerance policy towards injurious accidents and believe that we can achieve, and sustain, an accident-free working environment.

In line with our vision on becoming a global player in the energy infrastructure sector, we exceeded our Health, Safety and Environment (“HSE”) goals, reaching a total over 9.7 million manhours recorded for the last five (5) years without fatality, recorded 1.07 Lost Time Injury Rate (“LTIR”) in 2010 and achieved a 29% reduction in the Total Recordable Incident Rate (“TRIR”) compared to 2009.

While these improvements are encouraging, we will continue in 2011 to target zero LTIR and TRIR. This will be achieved through the implementation of programmes aimed at continuously strengthening our safety culture whilst simultaneously improving our HSE management systems and operational procedures.

HEALTH, SAFETY AND ENVIRONMENT

We believe that the development of a strong safety culture is essential for the long term success of our business. Our commitment to the provision of a safe working environment for all our employees will lead to efficiency improvements, lower costs and higher productivity. In June 2009, we had implemented an Incident Injury Free (“IIF”) programme to promote and embrace safety as a personal value. We have seen improvement in HSE statistics and changes to our employee’s behavior towards safety.

Apart from IIF, Wasco in collaboration with Chevron has implemented an Operational Excellence Team (“OET”) programme in our main operating facility in Kuantan. The

purpose of OET implementation is to study on several HSE elements for further improvement. Risk assessment is reviewed internally together with Chevron.

We will continue to develop, implement and maintain management systems in which work processes are clearly defined, risks are identified and mitigated, safe working procedures are developed and all employees understand their HSE responsibilities. In 2010, Wasco Coatings Malaysia Sdn. Bhd. (formerly known as PPSC Industries Sdn. Bhd.) has been re-certified with ISO 9001, ISO 14001 and OHSAS 18001.
